

A: If you are working on windows you can try this: Copy and paste to a code editor (any text editor) Hit CTRL+K Insert table body Go to View -> More Fonts -> Underline If you are using linux you can try to change the font.

Copy and paste to a code editor (any text editor) Press CTRL+K Change font You can change font by right clicking, or use Selection -> All Fonts -> Advanced -> Find Text -> Then change font. Finally you can save the code as plain text to.txt file. I suggest you use Note Pad++. Q: Getting same Id multiple times from DataBase in my app, I fetch a list of contact names from a database and I store it into an array. @Override public View getView(int position, View convertView, ViewGroup parent) { // Getting view View v = convertView; ViewHolder holder = null; if (v == null) { LayoutInflater vi = (LayoutInflater) getSystemService(Context.LAYOUT_INFLATER_SERVICE); v = vi.inflate(R.layout.row, null); holder = new ViewHolder(); holder.txtName = (TextView) v.findViewById(R.id.txtName); holder.txtPhone = (TextView) v.findViewById(R.id.txtPhone); holder.txtEmail = (TextView) v.findViewById(R.id.txtEmail); v.setTag(holder); } else { holder = (ViewHolder) v.getTag(); } ContactInfo info = getItem(position); holder.txtName.setText(info.getName()); holder.txtPhone.setText(info.getPhone()); holder.txtEmail
