An understanding of basic programming concepts and the need for an undergraduate.DAYTON, Ohio -- Dayton-based Virtual Training Village, Inc., is holding the nation's first virtual-residential school. It will begin in October and will be free. The goal is to develop a virtual school that will meet the needs of students who are home schooled, or attend private school. It will provide online courses and services like common sense, health and business and employment skills. The school will have online course materials, and independent instructors will provide virtual instruction and assessments. Students will have access to a virtual library, skills marketplace, national test pool, a writing center and online career consultation. The first class in which students will d4474df7b8
