## Kirisun Programming Software Pt8100 12

With the exception of the programming manual, The Kirisun PT8000 programming software is essentially the same as the Kirisun PT8000 mode software with a few. of the first half of the twentieth century, with its focus on the link between the family and Jewish achievement, befuddled by the fact that one-third of the graduates at its university or college were not Jewish. The class still suffers from “Einstein envy.” “Even though he’s become an icon for average Germans, the country of his birth could not acknowledge him because it didn’t accept his basic premise — that God has not left the world to the human race.” (p. 227) Saul, the son of Jewish immigrants, is the primary protagonist of the novel, and his journey from the rural town of Groszhausen, where he lives with his parents, to Berlin is the story of a countrywide search for identity. Before his arrival in Germany, Saul was a wide-eyed Jewish boy with a young, morose wife who eventually dies in childbirth and a lot of bad luck. He’s given up on any kind of a “meaningful life,” until he meets a German Jewish high school teacher, Charlotte, who thinks and lives differently. The two become the best of friends, and the story unfolds in their letters and private conversations as Saul continues to try to find a way of connecting with the world, which has ignored him, and he

---

tries to make up for the dreams that were never realized. Saul and Charlotte were both in the age group identified as “modern,” which meant that their parents were the “generation that survived the Holocaust, and who were the initial beneficiaries of the Marshall Plan. These immigrants had made the assimilation effort a success. They had come to Germany, survived its wartime conditions, and succeeded in leaving behind their Eastern European roots. Their children saw these parents as a model for successful integration and, in many cases, saw nothing wrong with imitating their model.” (p. 101) The “modern” generation became a deeply-embedded part of the cultural life of Germany — “the anti-communist moral majority,” as Spitz calls them. These moderns formed “a new, vociferous generation of German Protestants who believed the German nation had been responsible for so many horrors that its honor had to be redeemed.”
