I'm using the jquery.knob plugin to allow a user to edit a certain piece of data, however, this data is custom and needs to be mapped to a single line in my db. How can I do this using knockout? I've got as far as knockout.mapping.fromJS(viewModel.Custom.DataArray); but this maps the entire data array, so I need to do an individual mapping for the data values and then map the whole thing again. A: You are looking for the source code of mapping plugin. You can customize mapping or create your own mapping. The cabinet is set to meet later today to consider a government response to what it has been warned is a "worst case scenario" on the public finances. Despite hints that the future direction of the budget is still being negotiated between the parties, a consensus is emerging within the coalition that tax rises and spending cuts are needed. The independent Office for Budget Responsibility (OBR) has warned that the public finances could be £34bn worse off by the end of the parliament – equivalent to 3% of GDP. The Nats are now understood to be pushing for the chancellor to announce the budget within the next few weeks to pre-empt Tory infighting, a move that is likely to be supported by Labour. Finance spokesman John McFall has repeatedly confirmed that the budget will be unveiled in the second half of the year. "The government's not meeting, we've got to meet," he said. "At the very end of this year the government is proposing a budget, but only on the basis that it's not going to be a manifesto commitment." "I◆
