

Description: Free iPad To Computer Transfer Cracked Accounts is an application that is especially designed to help you copy files from your iOS device to your computer in a very simple manner. It's a tool that you can use to backup content to your hard drive as well as sync music to iTunes. User-friendly interface, suited for anyone Right off the bat, Free iPad To Computer Transfer is an application that can be handled by anyone. It automatically detects a connected device, grants you access to all media content and you can export it with a simple click. The graphical user interface is well designed in the sense that it is kept simple, straight to the point and practical. In a side-list you can view all the media types that the device contains and clicking any of them brings up the files. Depending on file type, Free iPad To Computer Transfer sorts them and displays information such as genre, artist, album, time and name. Images and photos taken with the device can be previewed in thumbnail size and if you are looking for a specific file, you can use the search function to locate it. Export to any location One of the things that make Free iPad To Computer Transfer an appealing tool, or which should make it so, is the fact that you can export a number of selected files with just two clicks. Regardless of the items you choose, the procedure is the same, you bring up the context menu and select the 'Export' option. The application then sends the files to a default location in your Documents folder but you can choose a custom export path. The best part about the latter is that you can set individual folders for music, movies, TV shows, podcasts, audiobooks, ringtones, playlists, voice memos and photos, while also being able to create subfolders for audio files (artist, album, genre) which ultimately help you keep content organized. On a closing note Summing the facts up, Free iPad To Computer Transfer is a really nice tool to have if you're looking to export files from your iPad within a few clicks and not worries.
