View the complete profileThe Government of Bangladesh and the UNDP are jointly organizing a one day seminar for the UNESCO Chair in Sustainable Development, entitled “Social and Environmental Justice in the Context of Development.” It will be held on July 30, 2015 at the National Academy of Science (Nas) Auditorium, at 8 am. The seminar was initiated by the UNESCO Chair in Sustainable Development and the UNDP. The Director General of Nas, Dr. Mahbub ur Rahman, is also in charge of the seminar. The Principal Director of UNESCO Chair in Sustainable Development, Dr. Ayyub Ahmed is the chief guest. Nas Organizing Secretary Dr. Anisur Rahman and Nas Vice-President Dr. Motiur Rahman will also give the seminar. Dr. Motiur has a special role in the seminar because he also represents Nas as the Deputy Prime Minister of Bangladesh. Bdg Prime Minister Sheikh Hasina had inaugurated the first edition of the seminar in December 2013. At the seminar, a scientific panel was formed under the Chair of Dr. Yasir Arafat, and a range of seminars on “Social and Environmental Justice in the Context of Development” will be held. Nas has already organized 4 seminars for the UNESCO Chair in Sustainable Development during the four-day seminar from July 27 to 30. The following groups participated in the seminar so far: UNESCO Sustainable Development Working Group (UNESCO) UN Women (Bangladesh) Center for International Earth Science Information Network (CIESIN) Bangladesh University of Engineering and Technology Bangladesh Water Resources Research Institute International Rice Research Institute (IRRI) International Organization of Migration (IOM) United Nations International Telecommunication Union (ITU) Bangladesh Center for Advanced Studies (BCAS) International Centre for Diarrhoeal Disease Research, Bangladesh (icddr,b) Bangladesh Agricultural Research Institute (BARI) Department of Land and Soil, Ministry of Agriculture, Livestock and Irrigation Neffa University Karuna Agricultural University University of Chittagong Institute of Social Sciences Research Institute of Policy and Management (RIPAM) University of Rajshahi Azimpur University Fasa University Sinjhila National University Islamic University

Income inequality in the United States has continued to skyrocket, according to a new study from the Institute for Policy Studies. The most telling chart? The top 1% of earners in the U.S. have a higher percentage of the nation's total income than the bottom 90% combined. The findings come from the latest version of the U.S. Census Bureau's income distribution report, the "Current Population Survey Annual Social and Economic Supplement," which also found that a third of American households – 47 million in total – lived in poverty. ADVERTISEMENT The report also found that income for the bottom 90% of U.S. households fell between 2009 and 2013, despite the introduction of the federal Affordable Care Act, commonly known as "Obamacare." It found that the bottom 90% of households saw their median income fall to \$24,389, a 1.6 percent decrease from \$24,570 in 2009. During the same period, the median income for the top 1 percent rose 8.6 percent to \$1,617,250. "Americans are enduring nearly a decade of weak income growth," IPP Vice President of Programs and Policy Rebecca Smith said in a press release. "After a brief decline, median income for the bottom 90 percent has resumed its steep descent." The average income for the bottom 20% of earners – those who make \$17,979 or less – fell 0.4 percent between 2009 and 2013. The same was true for the top 5 percent, whose income grew 0.4 percent. Smith said that income inequality in the U.S. is "near an all-time high," noting that in 2012, the top 1 percent earned 19 percent of the total national income. ADVERTISEMENT She added, "Income inequality is part of a larger issue of growing economic instability for the majority of Americans." "America's economic and political power is still largely built on a mythology of universal prosperity and economic security," Smith said. "But that mythology has eroded substantially as a result of the continued growth of inequality." Among the top 1 percent, only the top 50 households saw income increases in 2013. The number of households in the top 1 percent has been rising steadily since 2009. ADVERTISEMENT Smith said the recent spate of income inequality in the

## What's New In AutoCAD?

RevitLink: Convert RevitLink files to DWG format. Get version 2.1 of RevitLink that makes it easier to work with RevitLink files in AutoCAD. (video: 1:45 min.) PDF Resources: Open PDF files right in AutoCAD. On a new or existing PDF file, you can open it as a text file and read it using AutoCAD's Scribble or Layout window, or open it as a drawing directly in AutoCAD. (video: 1:14 min.) Fillet and profiles: Make curved and linear cuts faster with fillet, profiles and slant. AutoCAD automatically fits curves and cuts into grid spaces, so you don't have to, and you can work on any device you like. You can specify the profile of a tool by using the Profile command. Fillet is on by default. You can create slant in the drawing window, on the fly, without going through the New tool dialog. You can create slant with the Punch command. (video: 1:24 min.) Ink and line: Fill your drawing in the easiest way possible. Using the new Ink command, fill areas, lines and splines with your own custom color or even a gradient. You can select individual points, or even an entire spline. You can even dynamically recolor sections of splines that you select in your drawing. You can create a line with the new Line command. (video: 1:27 min.) XY Scaling: Use the XY Scaling tool to change the scale of your drawing, without scaling your entire drawing. Scale parts of your drawing to fit your viewing area. You can also quickly scale only parts of your drawing to change the zoom level of your drawing (or the entire drawing for that matter). (video: 1:28 min.) Bezier Precision: You can now use the Precision Indicator to precisely and easily draw an offset (or, when two points overlap, accurately connect two points). The Precision Indicator will appear at the right angle as you move the cursor. You can also create an offset on a curve, spline, text, hatch, line or polyline. (video: 1:36 min.) Find and Replace: Use the Find and Replace feature to search for text, fillets, dimensions, views, and other parts of drawings. You
