To get started, download and install the Adobe Photoshop CS6 Extended trial. (You can download the trial in the same place as you downloaded the program, or from the Adobe website.) You can download the program in its full trial form or in a Lite version that has only basic functionality. Regardless of the version of Photoshop you download, you must install it before you can use it. You can get your hands on a free version of Photoshop that comes with a serial number. If you really want to use a free version, however, you must first purchase or upgrade to a copy of Photoshop CS5 or CS5 Extended, all of which have free trial versions. You can purchase Photoshop at the Adobe store (www.adobe.com/shop) or through your computer or other Internet service provider. The first thing you need to know about Photoshop is that the program's interface is completely different than those in any other version of Photoshop before it. You must first choose which of Photoshop CS5, Photoshop CS5 Extended, or Photoshop CS6 you want to use. (The tutorials that accompany this book focus on how to use Photoshop CS6, but they're relevant to earlier versions of the software as well.) Regardless of which version you choose, you must also remember to install the program. (I have to repeat this because in previous versions of Photoshop, this step was omitted.) When you start Adobe Photoshop CS6, you see a Welcome screen, as shown in Figure 3-1. You must first choose whether you want to use the Lite or Standard version. If you choose the Standard version, you must then choose which template you want to use. You can get more information about choosing a template later in this chapter. **Figure 3-1:** Choose to use a Lite or Standard version of the program. After you create a new document, you open the Layers palette, as shown in Figure 3-2, and add your first layer. You can create raster images by using the default drawing tools or the tools available in the Photo Editing and Adjustment Layers panes. These tools enable you to edit one image over another in an image. **Figure 3-2:** The Layers palette is where you create a new layer, specify its type, and then make it visible or hidden. You can see a partial view of the Layers palette in Figure 3-3. The Layers palette shows only the current layer in the

[Tuberculosis in Italy. Epidemiological developments]. Bacille Calmette-Guérin vaccination was introduced into Italy in 1975, and has contributed to a remarkable reduction of the disease (31% of cases in the years 1980-1990). Since then, the numbers of cases have been steadily falling, being of 1084 in the year 1990. The main source of infection is identified as the constant contact with the tuberculosis patients. Even in young healthy adults, more than half of the cases are primary, the remaining being secondary. The proportion of cases with an unknown origin is not negligible, especially in the elderly, in whom the most likely diagnosis is the reactivation of a latent infection. Italy is considered to be a medium-low tuberculosis incidence country in the Southern European region, but there has been a certain increase of the disease in the recent years in some regions. In conclusion, the Bacille Calmette-Guérin vaccination has been highly appreciated, and an annual schedule should be maintained. Sunday, March 9, 2012 For the first time in a very long time, I don't have a project for the year. I usually have a nice little wooden dollhouse finished by the beginning of January. This year, I'm reusing a few things from previous dollhouses and putting them into a storage container. The storage container has a lid and will have my chest of drawers and a small block of drawers and a couple of drawers for other things. It's a simple idea, but the shelf makes it easier to store things. I had been wanting to redo my small chest of drawers in a small wooden dollhouse for a long time. The idea was to paint some of the drawers (the ones I like the best) black and white. It looks very classy. I had been using the chest of drawers to store dollhouse accessories and other things, like the electronics for the dollhouse. I thought this would make for a nice change. There is still plenty of room in the chest of drawers for my dolls, their accessories and a few small things I want to add. It's also small enough that I could use it for storing miscellaneous things like my camera stuff or my knitting needles. I had access to a nice wood from by a co-worker who had recently taken up woodworking. It's almost cherry, but not quite. I have some cherry that I just found at a craft store and was going to

Q: Cross-browser calc() function The calc() function in CSS3 is very powerful. It allows you to do a lot of interesting things like currency. The problem is that many browsers (like IE8) don't understand it. Is there a cross-browser, standards-compliant calc() function? The only thing I can think of is to parse the input string into three sub-strings and perform the math on each, but I'd rather find a better way. So far: IE7/8 and some older FF versions don't have a calc() function. So far, I'm assuming that's the best we can do. Modern versions of IE (up to IE9) and some other browsers don't understand calc() at all. So far, I'm assuming that's the best we can do. I've noticed that IE6-8 will do some simple math, like area in percentages, like calc(50% - 5px); and calc(10% - 3px);, but what I'm looking for is calc(100 - 40px); A: I have come across this question and answer on Stack Overflow. Barcelona have denied links with Chelsea midfielder Nemanja Matic as they prepare to close in on the signing of Victor Valdes from Atletico Madrid. Spanish publication Diario Gol have linked Matic with the Catalan club as Guardiola attempts to complete a major transfer coup as he looks to add quality players to his squad to add further competition to Barcelona's established playing group. Both Matic and Valdes are set to move to the Catalan club, who could announce a deal for the Chilean in the next few days, after the World Cup. Guardiola has also been linked with moves for Manchester United's Juan Mata and Liverpool's Alberto Moreno and has already agreed to bring Cesc Fabregas from Chelsea. Matic and Valdes are highly regarded by Guardiola and both have been key members of the club's successful team. Matic, who has been captain of the national team, has an estimated price tag of £30million. Mid-term Outcomes of Transapical Aortic Valve Implantation With Transaortic Tethering Technique.
