PictureProject Export Utility Crack + With License Key

An useful utility to export pictures captured with a PictureProject camera to a standard image-management component of your computer's operating system. DISCLAIMER - The author of this software does not provide any guarantee that your PC might not crash while using this software. - The author of this software does not provide any guarantee that this software will work with all PictureProject cameras. PROPER USE You are allowed to use this utility for personal use and you are not allowed to distribute, copy and give out this software under any other license. If you want to make it free for your whole organization then you need to get a license from the author. Please refer to for more details about PictureProject. What is new in Version 1.0.0.2 (2006-11-07)? What is new in Version 1.0.0.1 (2006-11-07)? General - Fixed an error: once a client (user) deletes a picture, PictureProject should report as if the picture was moved to recycle bin, not as if it was deleted. - Fixed an error: if PictureProject had already been closed, click Cancel button when exporting pictures to a standard image-management component of your computer's operating system using PictureProject Export Utility Full Crack. - Added an option to hide an "item name" in the list of captured pictures, using the check box "Hide item name". This option only works if you use a standard image-management component of your computer's operating system, like Windows Photo Viewer, which supports such a functionality. If you use another image-management component of your computer's operating system, such as Windows Explorer, this option does not work and you cannot hide an item name in the list of captured pictures. - Fixed an error: after pictures were cropped, the "Remove image" button should reappear - Fixed an error: when a PictureProject printer is connected, the printer is automatically removed from the list of available printers in PictureProject, and the user should manually add the newly connected printer to the list of available printers using the Add a printer... button - Fixed an error: when loading a PictureProject folder in the list of available PictureProject folders, some folders should be opened and some should not - Fixed an error: when loading a PictureProject folder in the list of available PictureProject folders, some folders of subfolders should be opened -
